PolicyLens_Internal - OFFICIAL REGULATORY DIRECTION
Standard Operating Procedure on Gold Packet Dual-Custody and Strong-Room Audits

Document ID: DOC_012 | Issuer: PolicyLens_Internal | Issue Date: 2021-12-03 | Source: https://compliance.policylens.example.org/policies/vault-custody-2021

Chapter 1: Operational Compliance Guidelines (DOC_012)

Chapter 2: Operational Compliance Guidelines (DOC_012)

Section 8: Joint Key Holding, Biometric Access and Surprise Tare-Weight Audit

8.1 JOINT CUSTODY OF STRONG ROOM KEYS
Every gold-loan branch strong room must operate under dual lock-and-key control held jointly by the Branch Manager (Custodian A) and the Senior Gold Appraiser (Custodian B). Overnight storage of both keys by a single employee constitutes a critical zero-tolerance audit breach.

8.2 QUARTERLY SURPRISE TARE-WEIGHT AND PURITY AUDIT
Internal Vigilance auditors must conduct an unannounced physical verification of 100% of pledged gold packets at least once every 90 calendar days, cross-verifying gross weight, stone deduction, and tamper-evident barcoded pouch seals.
